KENT SLOT DRAIN RECESSED ACCESS COVER (KSDRAC 300/200-100)

Specify:

Kent Slot Drain Recessed Access Cover KSDRAC 300/200-100; 300X200X100mm; Grade 316 Stainless steel; FACTA B; No Slot

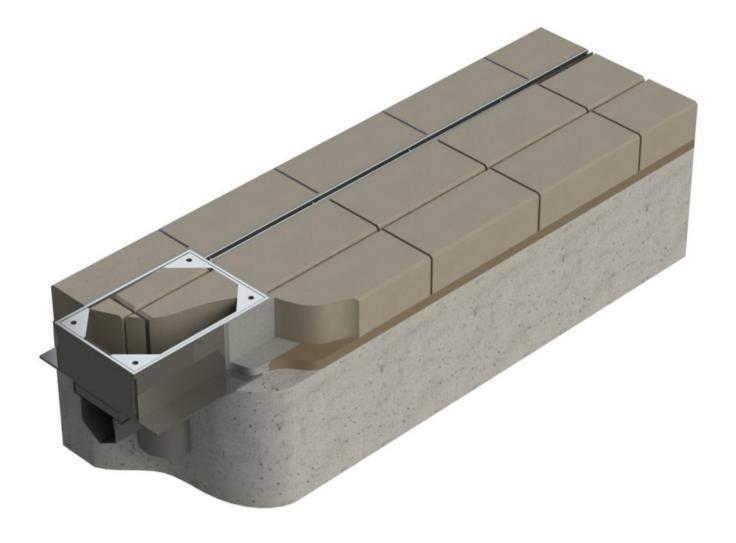

Description:

Kent Recessed Access Cover is a key component to the Kent Slot Drain system. The cover sits on top of either an access point or an outlet point and can be manufactured to suit any paving.

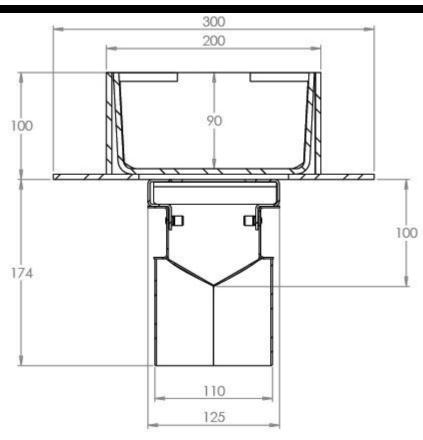

Kent Stainless recommend that an access point is installed for every 12 meters of slot drain. Recessed Access covers can be purchased with a slot built into its center or to the side, alternatively they can also be manufactured with no slot. They can also be moved from right to left if the site paving pattern requires this.

Features:

- B125 loading as standard- C250 & D400 versions also available
- 300mm x 200mm x 100mm as standard
- Available in either Grade 304 or Grade 316
- Can be manufactured to match pacing pattern
- central circular lifting points available
- Visible or Hidden options available

Maintenance of Stainless Steel

Clean the stainless steel components using warm water with a mild detergent with a non-abrasive cloth or sponge. Heavier stains may require the use of a nylon-scouring pad or a stainless steel cleaner.

To remove paint or graffiti use a cloth and Alkaline or solvent paint strippers according to type of paint. In the case of a bead blasted finish, where abrasive cleaning is required, always use a random circular rubbing action with a cloth.

In the case of brushed finishes the surface consists of uniform fine 'scratches' running in one direction so where abrasive cleaning is required always use a straight back and forward rubbing action in the direction of the grain using soap and warm water.

Rust spots or 'tea stains' can occur on the surface of the material, these are normally caused by contamination from ordinary mild steel, particularly in areas where construction work has been undertaken. Such stains can be removed using Rust Remover 410.

In cases where the surface is severely stained because of severe environmental conditions or scratched due to misuse, it may still be possible to restore the original finish using chemicals such as Oxalic Acid solution. There are many stainless steel polishes available to enhance the surface finish.

We recommend Mister Stainless Ltd. as a provider for stainless steel cleaning products.

Testimonials

"The In-house engineering completed by Kent Stainless and the Knowledge and advice given to finalise the design was outstanding"

- Parsons

"The client and the main contractor both were delighted with the quality of the work supplied by Kent Stainless"

- Skanska

"Because of the engineering know-how you provided and flexibility in design, we will certainly return to Kents for further work"

- Wexford County Council
