

Kent Fire Extinguisher Cabinets are designed for areas to provide either a recessed or free standing option within cleanrooms for storage of various fire extinguisher.

The cabinets are also easily cleaned with tight, smooth joints to wall and floor finishes. This creates ledge and crevice free surfaces.

The cabinets come complete with lockable glass doors for easy viewing of the contents while maintaining their security.

Bespoke options are always available on request

Features:

- Suitable for cleanroom, sterile rooms, food processing and research areas.
- No dirt traps
- Made to suit various wall thicknesses.
- Lockable doors with glass infill.
