

Kent Amphitheatre Seat

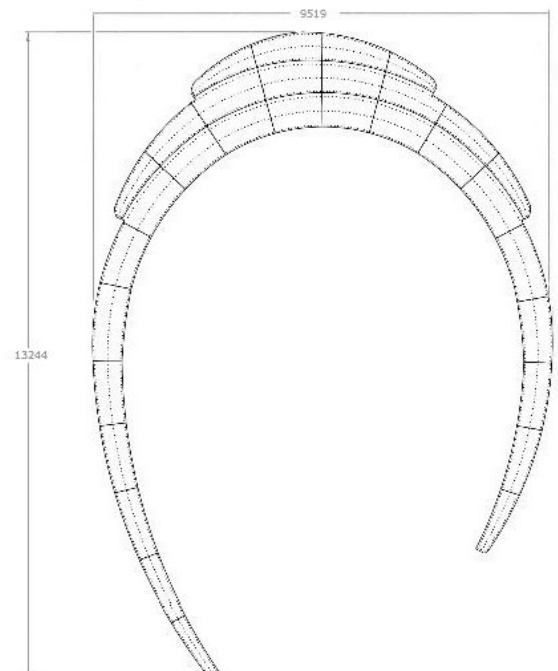

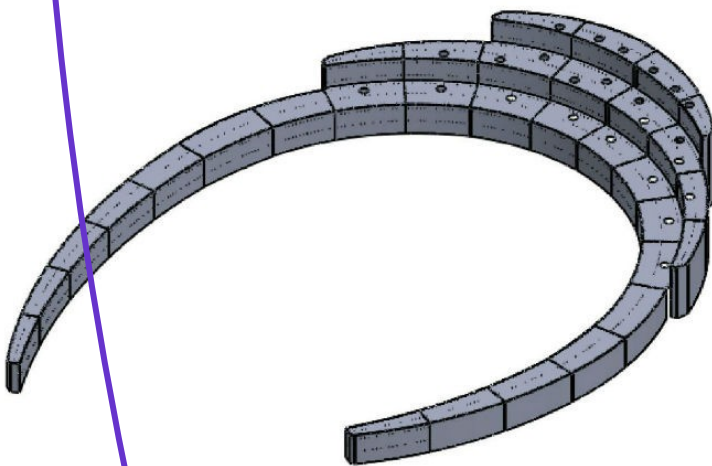

Kent Amphitheatre Seat KAS13244

Specify:

This customised seating was designed to give an amphitheatre effect to an area off Kingdom St. near Sheldon Square at Paddington Station in London. 4 Seats were installed on 2 sites on opposite ends of the street – three with a single bench and the other with 3 tiers. The amphitheatre seat was made in a 25m 15m radius and used grade A FSC certified European oak with 3 coats of Danish Oil. USB charging points were incorporated into the seats hidden behind a weatherproof flap.

Features:

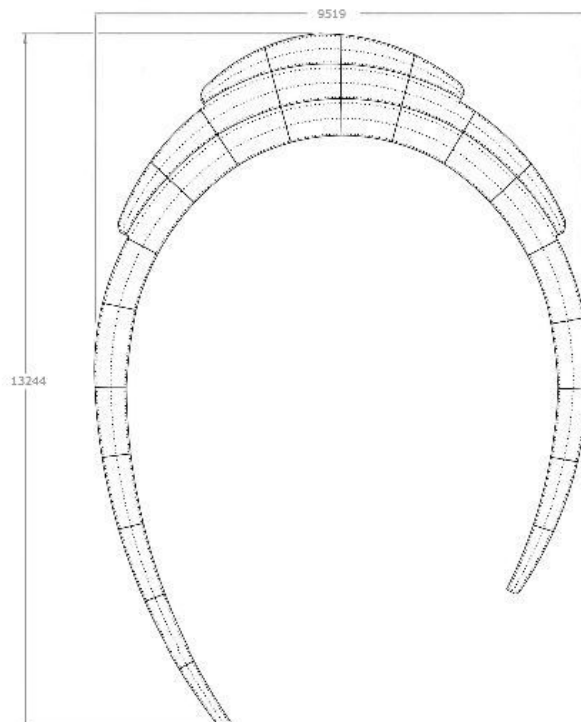

- USB Charging Points
- European Oak
- Treated with Danish Oil
- 304 Stainless Steel
- Weatherproof

Kent Amphitheatre Seat KAS13244

Kent Stainless continue to innovate and develop new modern elements into their products. In the case of the Kent Amphitheatre Seat KAS13244 we have developed an internal USB charger port, this is an essential tool in large urban areas today as pedestrians are constantly using their mobile devices in public realm areas.

In order to include an internal USB port we first had to ensure that the seat was weather tight.
