

RTPI Touchscreen Totem

Kent RTPi Touchscreen Totem KRTT3673

Specify:

The Kent RTPi Touchscreen Totem KRTT3673 is constructed from Grade 316L Stainless Steel, and enamel panels coloured to corporate colours. It measures 3673mm high x 776mm wide x 250mm deep. The top 776mm x 250mm illuminated beacon panel is customisable to any logo – in this case Frosted Perspex Lettering stands proud of the background blue rectangular panels and is backlit with white LEDs.

At eye level is a touchscreen, or a backlit map panel depending on the location. 10mm Toughened Glass Panels cover a reverse mounted poster.

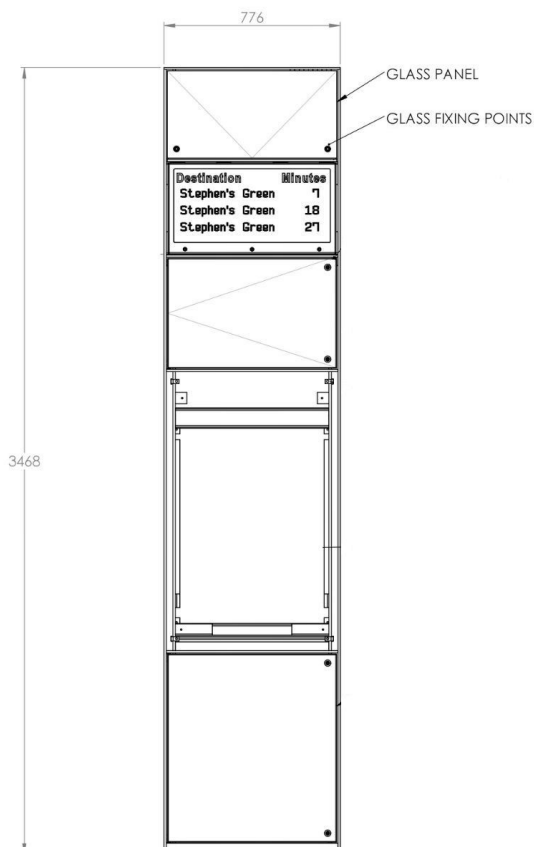

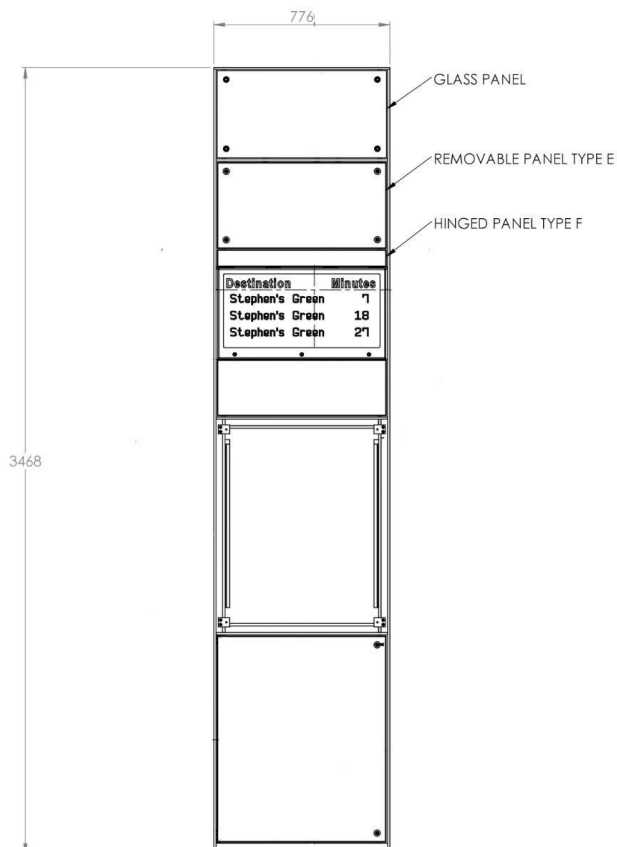

The monoliths were designed and manufactured for the Luas Cross City tram line in Dublin and formed part of a suite of furniture designed by RPA/TII and manufactured by Kent Stainless. The suite contained blue enamel panels and grade 316 stainless throughout.

Features:

- 316 Stainless Steel
- Enamel Panels
- RTPi Housing
- Touchscreen Housing
- Illuminated Map Panel Case
- Illuminated top Beacon
