

# Stainless Steel Vinyl Floor Rodding Eye

The Kent KVV225RE Rodding Eye is a round top stainless steel rodding eye, or cleanout, for vinyl and flexible floor areas. It matches our KVV225 range of gullies but has a sealed top. This rodding eye is single sealed by a neoprene gasket. The Top Part can be complemented with a KVBO gully body which will allow adjustable height similar to our KVV225/110 model. This particular rodding eye can be fitted with a foul air trap for industries and areas that cannot allow any air to flow back through the rodding eye. This is useful in particular laboratory environments for example.

## Features

- Grade 304 (1.4301) or 316 (1.4401) Stainless Steel to BS EN 10088.
- Satin finish as standard
- Ex Stock
