Outdoor Chess Table

STREET FURNITURE

Outdoor Chess Table

DESCRIPTION

At Our Lady's Island we installed our **Outdoor Chess Table** in early 2023. This is our outdoor **Greenwich Picnic Set** with our bespoke optional piece - wheelchair-access and chessboard as standard. By positioning the table leg to the rear it makes for a great space for any wheelchair type to comfortably sit at the table. Iroko Timber was used for the seat tops while Grade 316 Stainless Steel with our Shot Peened finish was used on the seat ends and the table top and leg. For the Checkerboard finish on the table top, we used 2 different finishes - Cold Rolled Electropolished and Bright Peened. Cold Rolled is the brighter/mirror effect finish we see in these above photos, while Bright Peened is the duller finish.

Internally in Kent this is referred to as the Kent Greenwich Picnic Set (Chess Variation)

FEATURES

- 316l
- Shot Peened
- Cold Rolled Electropolished
- Bright Peened
- Wheelchair Access
- Iroko Timber
- Checkerboard Pattern as standard

CLEANING & MAINTENANCE

Clean the stainless steel components using warm water with a mild detergent with a non-abrasive cloth or sponge. Heavier stains may require the use of a nylon-scouring pad or a stainless steel cleaner.

To remove paint or graffiti use a cloth and Alkaline or solvent paint strippers according to type of paint. In the case of a bead blasted finish, where abrasive cleaning is required, always use a random circular rubbing action with a cloth. In the case of brushed finishes the surface consists of uniform fine 'scratches' running in one direction so where abrasive cleaning is required always use a straight back and forward rubbing action in the direction of the grain using soap and warm water.

Rust spots or 'tea stains' can occur on the surface of the material, these are normally caused by contamination from ordinary mild steel, particularly in areas where construction work has been undertaken. Such stains can be removed using Rust Remover 410.

In cases where the surface is severely stained because of severe environmental conditions or scratched due to misuse, it may still be possible to restore the original finish using chemicals such as Oxalic Acid solution.
